SUMMARY

Backend Software Engineer with experience in developing scalable enterprise applications using Java, Python, and Spring Boot. Skilled in building RESTful APIs, implementing JWT-based secure authentication, and designing efficient database architectures with PostgreSQL and Neo4j. Proficient in AWS (EC2, S3), CI/CD pipelines, and Agile methodologies, with a focus on high-performance backend systems.

EXPERIENCE

Nectar IT | June 2025 – Present

Junior Java Developer

- Developed and maintained scalable backend applications using Java and Spring Boot
- Designed and implemented RESTful APIs for enterprise-level services
- Implemented JWT-based authentication and role-based access control
- Configured and deployed applications on AWS EC2, managed storage using AWS S3
- Supported CI/CD pipelines for automated build and deployment processes
- Debugged and resolved software defects to improve application performance and reliability
- Technologies: Java, Spring Boot, AWS, PostgreSQL, Neo4j, Apache Solr, REST APIs, Git, CI/CD

PROJECTS

Job-Day HR Management System

- Architected and built a comprehensive HR platform utilizing 18 Spring Boot microservices and a React frontend, serving over 10,000 users.
- Implemented robust JWT authentication, PostgreSQL databases, and Docker-based deployment, achieving 99.9% system uptime.
- Led a cross-functional development team, optimizing overall system performance by 60%.
- Reduced deployment time from 4 hours to 15 minutes by automating CI/CD pipelines.

Computer Inventory Management System

- Built a full-stack application to track and manage organizational IT assets efficiently.
- Developed a responsive user interface using React and Tailwind CSS for seamless asset tracking.
- Created backend services with Spring Boot and PostgreSQL, incorporating role-based access control.

EDUCATION

Bachelor of Computer Science Engineering

RP Sarathy Institute of Technology

2021 – 2025
CGPA: 7.5 / 10.0

SKILLS

Languages :

Java, Python, JavaScript, TypeScript

Backend Technologies :

Spring Boot, Django, FastAPI, RESTful APIs, Microservices, JPA/Hibernate, JWT

Frontend Technologies :

PostgreSQL, Neo4j, Apache Solr

Databases

PostgreSQL, Neo4j, Apache Solr

Cloud & DevOps :

AWS (EC2, S3), Docker, Linux, CI/CD Pipelines (Jenkins/GitHub Actions), Git

Tools :

Postman, Swagger (OpenAPI), IntelliJ IDEA, VS Code, Figma, n8n

AREAS OF INTEREST

- Software Development
- Network Security
- Hardware Testing and Repair
- Web Development
- DevOps

HOBBIES

- Listening to Music
- Watching Movies
- Hardware Repair

LANGUAGES

- Tamil (Native)
- English (Professional Working Proficiency)
